

## Care Recommendations CORAFLOOR®

CORAFLOOR® balcony panels are free of maintenance. However regular cleaning is recommended and gives your balcony floor a durable nice appearance. For cleaning, all common floor cleaners are suitable (e.g. Mr. Proper). Gasoline liquor, solvents and other strong cleaners must be avoided by all means because they could leave stains. After wiping or scrubbing the surface should be rinsed with water.

Generally soiling should be cleaned as soon as possible, since lasting stains could result otherwise. Specially soiling with coffee, red wine and mustard should be cleaned right away. Please see the table below with the tested substances and their impact on the surface:

Substance	Impact
Coca Cola	Non
Coffee	Could lead to discoloration
Red wine	Could lead to discoloration
Mustard	Could lead to discoloration
Salt	Non
Orange juice	Non
Ketchup	Non
Flower soil	Non

### Important notice to avoid damage:

- Glowing coal or burning cigarettes leave burning marks.
- Avoid dragging around items since this might scratch the surface.
- Avoid dropping heavy items (e.g. hammer) onto the surface, since this might leave dents and damages the coating.
